Open House Helsinki

The event is part of the Open House Helsinki 2022 program. Get a peak behind the scenes and meet the architects and the users to join a tour through the building with them. The event is opened with a brief lecture presentation about the design process by the architects, followed by a discussion with the users sharing their experience of the building. Afterwards, there will be a chance to tour the building with the architects in small groups. Registration is requested to join the tour.
