A school open to the city:
Enrico Fermi opens for the
EUmies Awards. Interior tour
with the architects and party
opening the building to the
neighbours.

Project by
BDR bureau

The aim of the designers was to transform the perception of the school by both young people and the local community, inserting green areas and functional spaces usable and accessible to all, accentuating the concept of community school.

The project was concluded in 2019 and funded by the Agnelli Foundation as part of the Torino fa Scuola project created in collaboration with the City of Turin, the Fondazione per la Scuola and the Compagnia di San Paolo and aimed at the renewal of school learning spaces. The event aims to open up these spaces to the neighborhood for the first time.
